

Bird Protection Profiles for Contact Wires

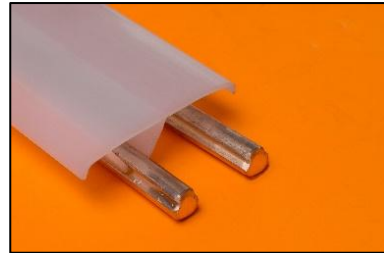

Bird protection profile for simple contact wire

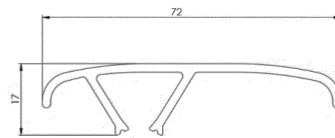

618740.100	VSP
Weight:	0.332 kg/m
Bird protection profile for simple contact wire (Length 4.5m)	

Bird protection profile for twin-wire

618740.550	VSPD
Weight:	0.440 kg/m
Bird protection profile for twin-wire (Length 3.0m)	

Large birds walking the contact wire often cause short circuits when flying off. This is effectively avoided by our bird protection profiles.

The bird protection profiles are suitable for the following contact wires: AC-100, BC-100, AC-107, BC-107, BF-107, AC-120, BC-120, BF-107, AC-150 und BC-150. For other contact wires please contact us.

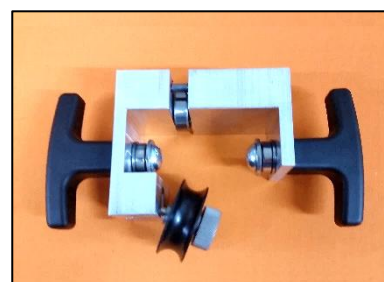

Ask for our installation instructions.

Installation tool for simple contact wire

618740.900	VSP-M
Weight:	0.610 kg/m
Installation tool for VSP	

Installation tool for twin-wire

618740.902	VSP-MD
Weight:	0.681 kg/m
Installation tool for VSPD	

The bird protection profile offers electric shock protection to prevent electrical arcing caused by birds or similar. It is NOT a high-voltage insulation for reducing the required electrical distance! For this purpose please see our flyer [High-Voltage Insulations](#).
